

Minerallac One-Hole Straps

The most trusted name in hardware since 1894

Minerallac invented and patented the one-hole strap in 1914. Since then, Minerallac has expanded the line to become the largest in the industry. Minerallac offers four distinct types of one-hole straps to address the unique needs of any application. All Minerallac one-hole straps are precision-made in the USA. No matter the application or the installation, Minerallac has the right one-hole strap for you with quality you can count on with 125 years of history to back it up. Additional one-hole straps for tubing, romex, SEU and SER available.

Standard Series

The Original Jiffy Clip®

The Standard-Series is Minerallac's original design patented in 1914. Utilizing an over-bent arch to snap it onto clamp onto tubing, pipe, conduit, or BX cable, the Standard-series has the broadest range of applications of all the Minerallac one-hole straps.

Sizes: 14-2 — 10-3 BX
1/2" — 1 1/2" EMT
1/4" — 1 1/4" rigid
Tubing: 1/8" — 1 1/2"

130

Medium Series

Most Popular Option

The Medium-Series strap is the workhorse of the lineup and is available in both zinc-plated and stainless steel. This strap creates loyalty among electrical contractors and is best suited for commercial and industrial applications.

Sizes: 1/2" — 2" EMT & rigid

MED45

Min-E Series

Easy to use

The Min-E Series has a short application platform, but makes up for that with a strong design and ease-of-use.

Sizes: 3/8 BX
1/2" — 1" EMT
1/2" & 3/4" rigid

MINE55

Heavy-Duty Series

Strongest Option

The Heavy-Duty Series features all of the same design elements as the Medium series, but it is considerably thicker. The H series is best suited for heavy industrial applications where a more robust strap is required.

Sizes: 1/2" — 6" EMT & rigid

H92

Minerallac Conduit Hangers

The most trusted name in hardware since 1894

Patented in 1904, the Minerallac Conduit Hanger has been a mainstay for the electrical contractor for over 100 years. Whether you want the traditional conduit hanger or the convenient keyhole style, every Minerallac Conduit Hanger is precision-made in the USA.

Conduit Hangers

The Original

The original Conduit Hangers, patented in 1904, come zinc plated or made from Type 304 Stainless Steel. They are available with or without bolt and nut attached. The original Conduit Hanger is available for ½" through 5" conduit.

Also available in aluminum, brass, or steel that has been galvanized or copper-plated*

Keyhole Conduit Hangers

No Nut Needed!

Modeled after Minerallac's Standard Conduit Hangers, the Keyhole Conduit Hangers - known as the K-Series - utilize innovative design to provide value and ease-of-use. The K-Series Conduit Hanger incorporated a keyhole design that eliminates the need for a nut! The K-Series is hot dip galvanized steel and is available in sizes ¾" — 1" rigid and ½" — 1" EMT.
